

REMARKS

The amendments to the paragraphs on pages 9 and 10 insert sequence identifiers for the *S. pombe* Dga1 and the Plh1 proteins that are identified as GeneDB Accession No. SPCC1235.15 and GeneDB Accession No.SPBC776.14, respectively. The number of residues in the Dga1 protein has been amended to reflect the actual number of amino acids in the protein corresponding to GeneDB Accession No. SPCC1235.15.

Paragraph [0092] on page 19 expressly states that "All documents referred to herein are fully incorporated by reference". These sequences correspond to GenBank Accession Nos. CAA2119 and CAA22887, respectively, which have been cited in an Information Disclosure Statement filed concurrently herewith. These sequences are identical to the corresponding GenBank entries as of the filing date of the priority application and, therefore, do not introduce new matter.

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-24, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 303-571-4000.

Respectfully submitted,

Milan M. Vinnola
